

Holdfast®

FLOORING ADHESIVES & ACCESSORIES

Holdfast now offers a complete solution for all floor-covering installations. Our range of products include adhesives, carpet gripper, hot-melt carpet seaming tape, flooring trims and installation tools. Most of our flooring products (excluding tools) are processed and manufactured in Australia.

Flooring adhesives

The Fabgrip range of flooring adhesives is a comprehensive package of carpet and vinyl adhesives. The Fabgrip range of adhesives offers the user the latest technology available for all stick down flooring installations.

Carpet gripper

The Fabgrip carpet gripper range includes a domestic extra wide strip and a commercial strip. Both products are manufactured from local Australian timber. The range of carpet gripper is 7.5mm thick and has hardened concrete nails. The wide and commercial are available in concrete, wood and plain (no pre-nails).

Carpet seaming heat bond tape

The Fabgrip range of heat bond tapes include general purpose paper back, silicon back, commercial grade gold foil, cold seam and double bond tape. All hot melt formulations are cutting edge and deliver a powerful bond at the carpet seams. The knitted fiberglass scrim and unique adhesive formulation helps reduce seam peeking.
