SEEMWELD ADHESIVE

DESCRIPTION:

Seemweld is a synthetic rubber / solvent based adhesive especially designed for seaming most direct stick down, carpet seams.

CHARACTERISTICS

- * Solvent based
- * Rapid drying
- * Instant grip
- * Easy to apply
- * Excellent water resistance
- * Economical
- * Very good ageing resistance
- * Available in; 20ltr, 4ltr & 1ltr sizes
- * Coverage; Approx. 100lm/ltr

APPLICATION:

Seams must be clean, dry and free from other foreign materials. If necessary wipe the seam area with a clean cloth dampened with water, allow to dry before applying Seemweld adhesive. Starting at one end of the area, place the applicator nozzle onto the seam adjacent and apply a 3mm continuous bead along the entire length of the seam. Lay the next length of carpet ensuring the pre-cut seam is pushed well into the bead of Seemweld so that positive transfer occurs between both seam surfaces. Do not heavy roll this seam to avoid adhesive transfer to the carpet pile. Use a standard seam roller and hand roll the length of the seam to achieve a completely flat surface. Do not allow heavy traffic within 24 hours after laying the floor-covering.

HANDLING PRECAUTIONS

Use only in well ventilated areas. Avoid contact with skin and eyes. Avoid breathing vapours.

CAUTION

Do not allow adhesive to freeze, unaffected by freezing when dry. This product has a shelf life of 6 months kept in unopened containers undercover at 20°C.

CLEAN UP:

To clean up tools, equipment and wet adhesive use Multi Purpose Cleaning Solvent.

VENTILATION

Always make sure that there is adequate ventilation when using this adhesive.

CONDITIONS OF SALE: contain a limited warranty against manufacturing defects.

NOTICE TO THE PURCHASER

All statements and technical information contained herein are based on tests we believe to be reliable but the accuracy thereof is not guaranteed. Users assume all risk and liability resulting from the use of this product and must confirm the suitability thereof by their own tests.
